

JTEKT : THE ORIGINAL BEHAVIOUR, QUALITY & ROBUSTNESS

WHY THE CHOICE OF YOUR STEERING SYSTEMS IS SO IMPORTANT ?

Steering development, supply chain and production for cars is important to understand because the choice of your spare parts might be dependant of the original OE specifications.

Discover why !

One steering OE Supplier by car

For each vehicle production, Original equipment manufacturer are chosen.

For a specific vehicle, a specific brand, dedicated products will be implemented.

This is the case for Steering Systems.

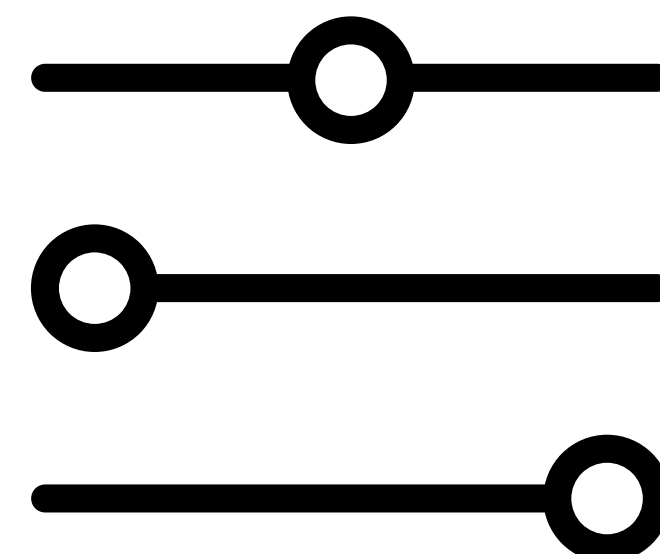

One car, one steering systems approved according to Car manufacturer specifications.

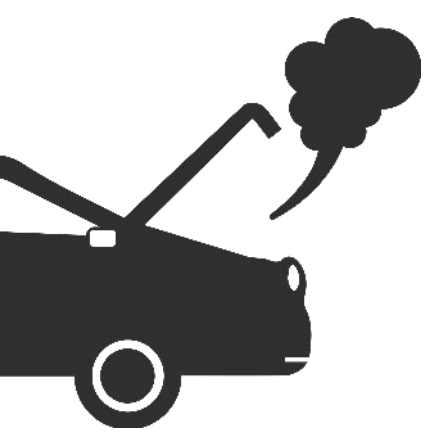

One steering calibration by car model

During the vehicle design phase, Car manufacturer asked to the selected steering supplier, to calibrate the system according to their specifications.

Tests are completed to ensure the optimal and safe product use.

What to do in case of breakdown?

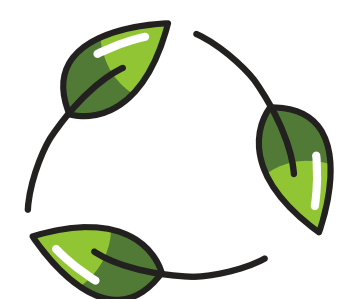

It is essential to replace the broken system by an identical original one because :

- Original robustness and lifetime is guaranteed
- **Similar steering calibration** is certificated
- **Last software update** is completed
- **High quality standard** are guaranteed
- **Safety check** is ensured

Does alternative to new product exist?

Remanufacturing is an alternative. By JTEKT, we have developed a specific process to remanufacture our old steerings and extending product life.
